Benefits of using public transport

1. **Plan your trips.**

Obtain timetable and route-maps for your journey to know what to expect in advance. Calculate online the fastest times and best route for your trip.

2. **Riding public transport saves money.**

Car payments, gas prices and parking can be a major budget drain, but public transport lessens those financial burdens by alleviating the need to purchase and operate individual vehicles.

3. **Freedom is amplified.**

The availability of public transport opens up personal mobility to everyone. Stay connected to the whole city!

4. **You will reach your destination earlier.**

In the big cities the traffic jams occur daily and entail the search for parking in swamped areas. Arrive at your destination without complications or stress.

5. **You can do other things while travelling.**

You will be able to catch up with that project that you are halfway through or give the last review of the exam notes. Saving time is key in our accelerated society.

6. **But if you prefer to disconnect...**

Listen to music, read a good book, review our social profiles or simply let ourselves be carried away by our thoughts, without having to be aware of the traffic or the bike lane.

7. **Public transport keeps air cleaner.**

The massive use of the private vehicle jams up cities and makes them dirtier. Public transport it is a small contribution for a more sustainable world.

8. **You will be healthier.**

No matter how close you are to the bus stop or the subway station, you will always do more exercise than going to your garage, taking the car and driving to your office.

9. **Public transport is safer than individual vehicles.**

The probability of suffering an accident while traveling by metro or public bus is less than by private transport.

10. **You contribute to the harmony and silence of your city.**

Cities with more use of public transport are also quieter and more harmonious. The abundance of traffic causes a lot of noise. Contribute to more peaceful and less noisy cities.
