

U-MOB LIFE15 GIC/ES/000056

Foro de **MOVILIDAD SOSTENIBLE**

Cooperación entre Universidad & Entidades Locales

Isabel Domínguez Perelló. Novotec

U-MOB | European Network for Sustainable Mobility at Universities. LIFE15 GIC/ES/000056

This forum is in the Framework of the European Project about sustainable Mobility: U-MOB LIFE.

LIFE project number LIFE15 GIC/ES/000056 This Project is funded by the European Union. It reflects only the author's view and the agency is not responsible for any use that may be made of the information it contains.

Foro de MOVILIDAD SOSTENIBLE

Cooperación entre Universidad & Entidades Locales

Qué es U-MOB?

U-MOB LIFE | European University Network for Sustainable Mobility :

- ✓ Proyecto cofinanciado por el programa **LIFE** de la Comisión Europea.
- ✓ Dirigido a crear una **red de universidades** que facilite el intercambio de conocimiento sobre buenas prácticas de movilidad sostenible entre las universidades europeas.
- ✓ Como herramienta para la reducción de emisiones de CO₂ debidas a la movilidad de la comunidad universitaria.

U-MOB LIFE PROJECT

nº LIFE15 GIC/ES/000056

www.u-mob.eu
contact: info@u-mob.eu

Duration: 5 years. 01/07/2016 – 30/06/2021

Budget: 1.329.427€ - 60% funded by the LIFE programme.

The conference is in the Framework of the European Project about sustainable Mobility: U-MOB LIFE.

LIFE project number LIFE15 GIC/ES/000056 This Project is funded by the European Union. It reflects only the author's view and the agency is not responsible for any use that may be made of the information it contains.

Foro de **MOVILIDAD SOSTENIBLE**

Cooperación entre Universidad & Entidades Locales

¿Por qué un proyecto que impulse la movilidad sostenible en universidades?

1. Las universidades son importantes **polos de atracción**, por tanto son el origen de frecuentes desplazamientos diarios en nuestras ciudades.
2. Juegan un papel clave en **la educación de las generaciones futuras**.
3. Por tanto, son un potente instrumento para **implementar la política europea** ahora y en el futuro.

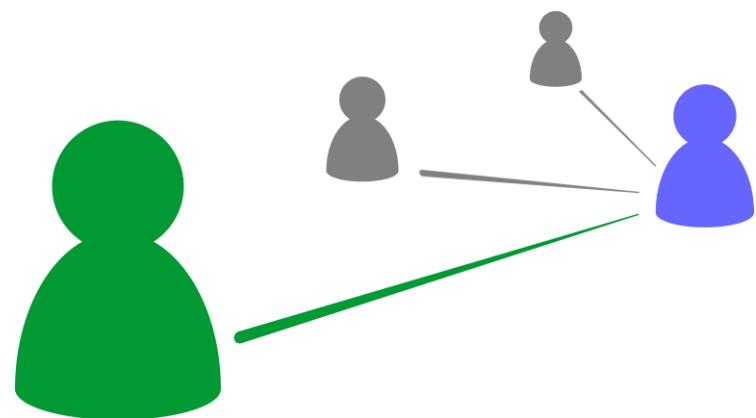

La estrategia europea urbana pretende cambiar el balance entre los diferentes sistemas de transporte, favoreciendo el público frente al privado, y reduciendo el impacto del coche.

¿Y por qué crear una red europea de universidades?

- ✓ En Europa, hasta ahora, cada Universidad ha hecho su camino por su cuenta
- ✓ O, en algunos casos, con universidades del mismo país o región.

U-MOB LIFE pretende crear un instrumento para que las universidades de toda Europa compartan conocimiento, problemas y preocupaciones, pero también soluciones de éxito.

Este intercambio permitirá avanzar a medio y largo plazo.

Qué es U-MOB?

Uno de los objetivos del proyecto es:

- ✓ Impulsar **políticas de movilidad** sostenible entre las autoridades públicas y las entidades de transporte a nivel local.

Una de las tareas del proyecto consiste en:

- ✓ Desarrollo de una Guía para facilitar la **cooperación entre universidades y actores locales**: dificultades, consejos y casos reales de acciones de éxito.

En este objetivo y en esta tarea se enmarca esta jornada.

Foro de **MOVILIDAD SOSTENIBLE**

Cooperación entre Universidad & Entidades Locales

¿Quién forma el consorcio del Proyecto U-mob?

Cuatro universidades con gran experiencia en el campo de la movilidad:

Una fundación con experiencia en comunicación y formación, aspectos clave en el proyecto:

FUNDACIÓN **equipo humano**

Como coordinador del proyecto, una empresa de consultoría especializada en proyectos ambientales:

novotec

¿Qué aporta Umob a las universidades de la red?

1. Acceso a buenas prácticas implementadas en universidades europeas

Ya tenemos más de **90 buenas prácticas!!!!**

Cukrowa Bike
2015

Best Practices

- + Awareness and participation
- + Collaboration University - local stakeholders
- + Collection of data
- + Curricular system
- + Cycling mobility
- + Intermodal mobility
- + More efficient car use
- + Networking among Universities
- + Pedestrian mobility
- + Public transport

European Community

Benefits of cycling

1. **Cycling saves time.**
Cycling to university can reduce the time of your commute: you will not have to wait for rush hour jams or waiting for public transport. You can choose your own schedules!
2. **You'll be fitter.**
Regular cycling everyday has huge benefits: if you combine the exercise with eating healthy you will be loosing weight.
3. **Cycling improves mental well-being.**
Cycling combines physical exercise with being outdoors and exploring new views. You can ride solo – giving you time to process worries or concerns, or you can ride with a group which broadens your social circle.
4. **You'll sleep better.**
An early morning ride might tire you out in the short term, but it'll help you catch some quality shut-eye when you get back to your pillow. The exercise promote the reduction in anxiety and will help you to sleep more deeply.
5. **You'll save money.**
You will not have to pay gasoline, nor transport payments, you just have to take into account the care of your bike. You will save money!
6. **You'll burn more calories.**
The efficiency with which it burns calories and fat – is not only raised during a ride, but for several hours afterwards.
7. **Grow your social circle.**
Joining a cycling club or group is an excellent way to grow your social circle, and if you're new to riding – you'll probably find all the maintenance and training advice you may have been looking for there, too.
8. **Make creative breakthroughs.**
Outdoor exercise helps resolve mental blocks and make decisions, as well as increase creativity.
9. **Cuts heart disease and cancer risk.**
Cycling raises your heart rate and gets the blood pumping round your body, and it burns calories, limiting the chance of you being overweight.
10. **Save the planet.**
Twenty bicycles can be parked in the same space as one car. It takes around five percent of the materials and energy used to make a car to build a bike, and a bike produces zero pollution.

U-mob>
Pedestrian in motion

Benefits of walking

1. Your jeans will get a little looser.
2. Your mood will improve.
3. Walking improves digestion.
4. You'll fight cancer.
5. You'll save money.
6. Your brain will function better.
7. It boosts immune function.
8. Save the planet.
9. Increases lung capacity.
10. Delays aging.

U-mob>

Benefits of walking

1. **Your jeans will get a little looser.**
That's because regular walking can help improve your body's response to insulin, which can help reduce belly fat.
2. **Your mood will improve.**
Whether you're feeling stuck at work or you've been searching for a solution to a tricky problem, it's a good idea to get moving. Going for a walk can spark creativity!
3. **Walking improves digestion.**
If you currently praise coffee for keeping your digestive system going strong, get ready to start thanking your morning walk instead. That's because a regular walking can greatly improve gastric mobility.
4. **You'll fight cancer.**
A sedentary lifestyle is one of the causes of cancer. Scientists have found that walking can help reducing the risk of cancer.
5. **You'll save money.**
You will not have to pay gasoline, nor transport. All you'll need are your legs and a small dose of motivation!
6. **Your brain will function better.**
Walking helps supplying the brain with the required amounts of oxygen and glucose, which helps the brain functioning better.
7. **It boosts immune function.**
Walking at least 30 minutes a day can help bolstering the activities of the immune cells, namely, the B-cells, T-cells, and the natural killer cells.
8. **Save the planet.**
Active transportation does not require fuel and does not cause air pollution. It also frees up more space on the roads, making your neighbourhoods more pleasant.
9. **Increases lung capacity.**
When you walk, you breathe in more oxygen as compared to when you are stationary. This exchange of oxygen and carbon dioxide at a larger volume can help increase your lung capacity.
10. **Delays aging.**
Researchers found that people who exercise regularly at a moderate to high intensity actually have longer telomeres in their DNA. They provide a vital function to the body by protecting the chromosome from deteriorating.

✓ Public transport in motion campaign

Folletos + carcasa de móvil

U-mob>
Public transport in motion

Benefits of using public transport

1. Plan your trips.
2. Riding public transport saves money.
3. Freedom is amplified by Public Transport.
4. By using the public transport, you will reach your destination earlier.
5. You can do other things while travelling.
6. But if you prefer to disconnect...
7. Keeps air cleaner.
8. You will be healthier.
9. Is safer than individual vehicles.
10. You contribute to the harmony and silence of your city.

Want to know more?
www.u-mob.eu

*With the contribution of the
LIFE financial instrument of the
European Community

Benefits of using public transport

1. **Plan your trips.**
Obtain timetable and route-maps for your journey to know what to expect in advance. Calculate online the fastest times and best route for your trip.
2. **Riding public transport saves money.**
Car payments, gas prices and parking can be a major budget drain, but public transport lessens those financial burdens by alleviating the need to purchase and operate individual vehicles.
3. **Freedom is amplified.**
The availability of public transport opens up personal mobility to everyone. Stay connected to the whole city!
4. **You will reach your destination earlier.**
In the big cities the traffic jams occur daily and entail the search for parking in swamped areas. Arrive at your destination without complications or stress.
5. **You can do other things while travelling.**
You will be able to catch up with that project that you are halfway through or give the last review of the exam notes. Saving time is key in our accelerated society.
6. **But if you prefer to disconnect...**
Listen to music, read a good book, review our social profiles or simply let ourselves be carried away by our thoughts, without having to be aware of the traffic or the bike lane.
7. **Public transport keeps air cleaner.**
The massive use of the private vehicle jams up cities and makes them dirtier. Public transport it is a small contribution for a more sustainable world.
8. **You will be healthier.**
No matter how close you are to the bus stop or the subway station, you will always do more exercise than going to your garage, taking the car and driving to your office.
9. **Public transport is safer than individual vehicles.**
The probability of suffering an accident while traveling by metro or public bus is less than by private transport.
10. **You contribute to the harmony and silence of your city.**
Cities with more use of public transport are also quieter and more harmonious. The abundance of traffic causes a lot of noise. Contribute to more peaceful and less noisy cities.
